

```
int led_red = 12;
int led_green = 13;

void setup() {
  pinMode(led_red , OUTPUT);
  pinMode(led_green , OUTPUT);
}

void loop() {
  digitalWrite(led_red , HIGH);
  digitalWrite(led_green , LOW);
  delay (1000);
  digitalWrite(led_red , LOW);
  digitalWrite(led_green , HIGH);
  delay(1000);
}
```
